Chapter 1: Ten Principles of Economics

This chapter introduces fundamental concepts such as opportunity cost, marginal analysis, and the role of incentives.

Sample Questions & Solutions:

- Question: Explain how incentives influence economic behavior.

Answer: Incentives motivate individuals and firms to make decisions that align with their interests. For example, higher prices incentivize producers to increase supply, while lower prices may discourage production.

- Question: What is opportunity cost? Provide an example.

Answer: Opportunity cost is the value of the next best alternative foregone when making a decision. For instance, the opportunity cost of attending college is the income foregone from not working full-time during that period.

Chapter 3: Supply and Demand

This chapter explores how markets allocate resources through the interaction of supply and demand.

Sample Questions & Solutions:

- Question: What happens to the equilibrium price when demand increases and supply remains unchanged?

Answer: The equilibrium price rises because higher demand shifts the demand curve to the right, leading to a higher intersection point with the supply curve.

- Question: Describe the effects of a price ceiling below equilibrium.

Answer: A price ceiling below equilibrium causes a shortage because the quantity demanded exceeds the quantity supplied at that price, leading to potential rationing issues.
