```

```
G81 X10 Y10 Z-5 R2 F50 ; Drills hole at (10,10) with depth -5, retract 2mm, feed rate 50
```

```
```
```

Similarly, cycle calls can be customized for complex patterns.

Macro Programming and Custom Routines

Advanced users can create macros for specific tasks, reducing programming time and increasing consistency. These routines can include conditional statements, loops, and parameter calculations.

Optimizing Tool Path and Sequence

Efficient G code programming involves minimizing tool movements, grouping similar operations, and optimizing punching sequences to reduce cycle time and tool wear.
