Can you explain what 'AOA' stands for and its significance? AOA stands for Angle of Attack, which is the angle between the aircraft's chord line and the relative airflow; it is vital for understanding lift generation and avoiding stall conditions. What is the purpose of a 'Flap' on an aircraft? Flaps are hinged surfaces on the wings that can be extended to increase lift and drag during takeoff and landing, allowing for shorter runway requirements and better control at low speeds. Why is an 'Emergency Exit' important in aircraft design? Emergency exits provide quick evacuation routes in case of an emergency, ensuring passenger safety by facilitating rapid egress from the aircraft.
