1. Problem Definition

Example:

If a client faces declining sales, Weiss would advise to specify whether the decline is in revenue, units sold, or market share, and over what period.

Once the problem is clear, Weiss recommends formulating hypotheses—initial assumptions about potential causes. These hypotheses guide the data collection process and help prioritize analysis.

Common hypotheses might include:

Step 2: Formulate Hypotheses

Potential causes might include rising raw material costs, inefficient supply chain management, or decreased pricing power due to increased competition.

Step 3: Data Collection

Analyzing supplier contracts, cost structures, competitor pricing, and customer feedback helps validate hypotheses.

Step 4: Generate Insights

Data reveals raw material costs have increased due to supplier issues, and competitors are offering lower prices.

Step 5: Develop Strategic Options

Options could include renegotiating supplier agreements, sourcing alternative materials, or differentiating through branding to justify premium pricing.
