Grade boundaries are the minimum marks required for a candidate to achieve a particular grade in an exam. They serve as the threshold between different levels of achievement, translating raw marks into standardized grades such as A, A, B, C, D, and E, and sometimes below that, into U (ungraded).

How Are They Determined?

Grade boundaries are not fixed; they vary from year to year depending on the exam's difficulty, the performance of the cohort, and the overall assessment standards. The process involves:

- Standard Setting: A committee of subject specialists and examiners reviews the exam's performance.
- Statistical Analysis: Data from the exam, including question-level statistics, are analyzed to ensure fairness.
- Expert Judgment: Examiners provide insights based on the difficulty of questions and the expected performance levels.
- Final Adjustment: Boundaries are set to reflect the intended grade distribution, maintaining consistency and fairness across different exam sessions.

The Context of IGCSE Mathematics June 2013

The June 2013 session was notable for various reasons, including the level of challenge posed by the exam and the performance trends observed.
