Additionally, publicly accountable enterprises follow the International Financial Reporting Standards (IFRS) as adopted in Canada.

2. The Going Concern Assumption

This assumes that a business will continue to operate indefinitely unless there is evidence to the contrary. It influences how assets and liabilities are valued and reported.

3. The Monetary Unit Assumption

Financial data is reported in a stable currency, and the effects of inflation or deflation are generally ignored, focusing on consistent measurement over time.

4. The Time Period Assumption

Businesses must report financial results over specific periods (monthly, quarterly, annually), facilitating timely decision-making.

5. Cost Principle

Assets are recorded at their original purchase price, not their current market value, ensuring objectivity and verifiability.

6. Revenue Recognition Principle

Revenue should be recognized when it is earned, regardless of when cash is received, aligning revenues with the period in which they are generated.

7. Matching Principle

Expenses should be matched with the revenues they help generate in the same period, providing a clear picture of profitability.

8. Conservatism Principle

Accountants should choose the solution that results in lower profits or asset values when faced with uncertainty, preventing overly optimistic reports.
