Design and Development of the Blackboard Interviewing Script

The deployment of an effective interviewing script requires meticulous planning and technical expertise. At the University of St. Thomas, the development process involves collaboration between IT specialists, instructional designers, and faculty members.

Development Phases:

- Needs Assessment: Identifying specific interaction points where scripting can improve user experience.

The scripting often employs branching algorithms to ensure a conversational flow that feels natural and responsive, avoiding generic or mechanical interactions.

Usability and User Experience: An Investigative Perspective

Analysis of User Interaction Data

Analytics indicate high engagement during initial onboarding scripts, with dropout rates increasing during troubleshooting flows. This suggests potential bottlenecks or confusing prompts that hinder completion.

The data points to the need for:

- Streamlining dialogue pathways.
- Incorporating more visual and auditory cues.

Technical Challenges and Limitations

While the scripting capabilities of Blackboard provide considerable flexibility, several limitations impede perfect execution:
