Beginners should start with simple indicators and gradually expand their toolkit.

Trading Strategies for Beginners

While there is no one-size-fits-all approach, the following strategies are accessible for newcomers:

1. Buy and Hold (HODL)

Purchase cryptocurrencies and hold them for the long term, ignoring short-term volatility. Suitable for those who believe in the asset's long-term potential.

2. Dollar-Cost Averaging (DCA)

Invest a fixed amount at regular intervals, reducing the impact of volatility and avoiding timing the market.

3. Swing Trading

Capture short to medium-term price movements by holding assets from days to weeks.

4. Day Trading

Make multiple trades within a single day to profit from small price fluctuations. This requires significant time, skill, and discipline.

5. Arbitrage

Exploit price discrepancies of the same asset across different exchanges.
