Question 1: What is the primary purpose of creating a budget?

- A. To track spending and save for future goals
- B. To limit spending and prevent financial growth
- C. To increase debt and expenses
- D. To avoid making financial decisions

Correct Answer: A. To track spending and save for future goals

Explanation:

Creating a budget helps individuals or businesses understand where their money is going, set aside savings, and plan for upcoming expenses. It's a proactive tool for financial control, enabling better decision-making and goal achievement. The other options either misrepresent the purpose of budgeting or suggest negative outcomes that are generally avoided through proper financial planning.

Question 2: Which of the following is considered a good investment?

- A. A savings account with no interest
- B. Stocks with high volatility and risk
- C. A diversified portfolio with steady growth
- D. An investment that promises guaranteed returns

Correct Answer: C. A diversified portfolio with steady growth

Explanation:

A diversified portfolio spreads investments across different asset classes, reducing risk and promoting steady growth over time. Stocks with high volatility can be risky but may offer higher returns; however, they are not guaranteed. Savings accounts with no interest do not grow your money, and investments with guaranteed returns are often scams or unrealistic. Diversification is a fundamental principle of smart investing.

Question 3: What is a risk associated with starting a new business?

- A. Guaranteed profits
- B. Unlimited potential for success
- C. Financial loss and failure
- D. No competition

Correct Answer: C. Financial loss and failure

Explanation:

Entrepreneurs are individuals who innovate, manage, and take risks to start and grow new ventures. They are proactive in seeking opportunities and are willing to accept uncertainty for potential

rewards. Employees work within existing structures, and saving money without investing doesn't characterize entrepreneurship.

Question 5: Why is it important to understand interest rates?

- A. To avoid paying any interest on loans
- B. To understand how borrowing and saving work
- C. To ensure loans are always paid back immediately
- D. To ignore the cost of credit

Correct Answer: B. To understand how borrowing and saving work
