Assessing Map Accuracy in a Rapidly Changing City

Houston's urban landscape is characterized by continuous development, with new roads, bridges, and neighborhoods emerging regularly. The accuracy of a folded map hinges on its update cycle. Rand McNally releases city maps periodically, typically every 1-2 years, to reflect recent changes.

Studies and user reviews indicate that:

- Major highways and interstates are generally accurate.

- Recent developments like new residential subdivisions or commercial complexes may be absent if the map is outdated.

- Road closures and construction detours are sometimes not reflected immediately, necessitating cross-reference with real-time sources.

Limitations and Common Discrepancies

Despite careful updates, some discrepancies persist:

- Temporary construction zones or detours.
- Newly opened roads or street name changes.
- Changes in traffic patterns or one-way street configurations.

Therefore, while Rand McNally maps are reliable for general navigation, they should be supplemented with current online sources for time-sensitive travel.

Usability and Practicality for Different User Groups

Tourists and Visitors

For visitors to Houston, the folded map offers:

- A comprehensive overview of the city layout.
